**Abstract:** The S-N(H)-N=C linkage in the title molecule,  $C_{12}H_{12}N_2O_2S_2$ , is non-planar [torsion angle =  $15.5(1)^\circ$ ] as the amino N atom is pyramidally coordinated. The amino group acts as a hydrogen-bond donor to an O atom of an adjacent molecule, generating chains running parallel to the *c* axis.
